

Water Supply -- OMBIL

Status:

In Progress

IWR Contact:

Ted Hillyer (Theodore.M.Hillyer@usace.army.mil)

Purpose:

Prior to becoming a business program in 2004, the data base for water supply had historically been updated on an ad hoc basis, with the last one being compiled in 1996. In May 2004 a request to the MSCs was distributed by HQUSACE to update the 1996 data as well as provide new data. This exercise was repeated in March 2005. As this reiterative process was a requirement to provide current data on the Corps water supply program, it was decided to incorporate this function into the Operation and Maintenance Business Information Link (OMBIL). This effort is currently underway with a projected completion date of 31 September 2007. This September 2007 data will reflect 2006 water supply data.

Objective:

To be able to respond to questions and concerns related to the Corps water supply program to the Office of Management and Budget, the Office of the Assistant Secretary of the Army (Civil Works), the Congress, HQUSACE, MSCs, districts and the general public.

Benefits:

Keepint the water supply data current, once loaded into OMBIL, will be a much smoother, easier and less costly process. The data will also always be current.

Progress:

The initial meeting among the Corps and the OMBIL contractor (CDM) was held in Carbondale, IL in March 2003. A training/loading session with Corps district employees was held in Tulsa, OK in November 2006 and another session with the contractor was held in February 2007.
